

In the Claims:

Please amend the claims by substituting the following:

Claim 1 (currently amended) A system for transporting digital media, said system comprising:

an inner pocket having an opening into which a digital media can be inserted; and

~~a foldable jacket into which said inner pocket can be inserted;~~

an envelope, said envelope having an opening into which said ~~foldable jacket~~ inner pocket can be inserted, and a sealing portion for sealing the inner pocket within said envelope, said sealing portion having a detachable portion and a reseal portion,

wherein the envelope can be unsealed by detaching the detachable portion of said sealing portion, and

wherein ~~said foldable jacket is made of reinforced material~~ the enveloped can be resealed using the reseal portion of the sealing portion after the detachable portion of said sealing portion is detached.

Claim 2 (currently amended) The system of claim 1, further comprising a jacket into which said inner pocket can be inserted, said jacket insertable into the opening of said envelope, said jacket being made of reinforced material ~~wherein said envelope includes a detachable sealing lid for sealing the foldable jacket within said envelope.~~

Claim 3 (original) The system of claim 1, wherein said inner pocket is made of high-density polyethylene fibers material.

Claim 4 (original) The system of claim 1, wherein said digital media is a DVD.

Claim 5 (original) The system of claim 1, wherein the envelope is made of light-weight paper having paper weight less than 75g/m².

Claim 6 (currently amended) The system of claim 2, ~~claim 1~~, wherein the reinforced material is one of cardboard or plastic.

Claim 7 (currently amended) The system of claim 2, wherein the reseal portion of the sealing portion is ~~envelope includes~~ a foldable flap joining the opening of the envelope along one edge, and joining the detachable portion of the sealing portion along another edge ~~a side edge of the lid.~~

Claim 8 (currently amended) The system of claim 1 ~~claim 7~~, wherein the inner surface of ~~said foldable flap~~ the reseal portion of the sealing portion is coated with an adhesive.

Claim 9 (currently amended) A system for transporting digital media, said system comprising:

a foldable jacket into which said digital media can be inserted;

an envelope, said envelope having an opening into which said foldable jacket can be inserted, and a sealing portion for sealing the foldable jacket within said envelope, said sealing portion having a detachable portion and a reseal portion,

wherein the envelope can be unsealed by detaching the detachable portion of said sealing portion, and

wherein the enveloped can be resealed using the reseal portion of the sealing portion after the detachable portion of said sealing portion is detached

wherein said foldable jacket is made of reinforced material, and

wherein the inner surface of said foldable jacket has a non-abrasive texture.

Claim 10 (new) The system of claim 9, wherein the envelope is made of light-weight paper having paper weight less than 75g/m².

Claim 11 (new) The system of claim 9, wherein the reinforced material is one of cardboard or plastic.

Claim 12 (new) The system of claim 9, wherein the reseal portion of the sealing portion is a foldable flap joining the opening of the envelope along one edge, and joining the detachable portion of the sealing portion along another edge.

Claim 13 (new) The system of claim 9, wherein the inner surface of the reseal portion of the sealing portion is coated with an adhesive.
